www.vams.com.au

A sophisticated workplace OH & S, risk & property management tool that monitors and reports on incidents, jobs and maintenance.

Tracks scheduled, preventative and re-active tasks to improve the efficient management of assets, property, people & the workplace

■ ROOMS & PROPERTY

Manages work to be performed - in occupant rooms, on plant and equipment within the facility or across shared facilities such as dining rooms, thoroughfares and open spaces. Applies equally to residential, industrial or mining infrastructure and plant.

■ HEALTH & SAFETY

Software to assist organisations with their legislative, health and safety and duty of care responsibilities. Achieved by identifying, profiling and acting to minimize hazards in the workplace. Manages both pro-active and reactive situations.

■ HELP DESK & TRACKING

Call logging that captures information to assist problem identification, diagnosis, escalation and resolution. Filter and sort by key fields to facilitate clear identification of urgency and progress through to expected completion.

■ SCHEDULING & PLANNING

Define and automatically schedule recurring tasks based on time and usage intervals. Review according to milestones and reschedule based on availability of parts and labour. Supports productivity improvement and reduces downtime.

... OH&S risk management -
of people & property ...

ROOM & PROPERTY

An issue, maintenance and safety tracking system that delivers:

- Room day to day maintenance and repairs.
- Asset cost and performance history.
- Property management, inspections and monitoring.
- Prioritisation by due date and type of work.
- Risk profiling by likelihood and consequence.
- Search and filter analysis and reporting tools.

HEALTH & SAFETY

Encourages a systemic and process oriented approach using:

- Grading of hazards based on level of risk.
- Clear description of the situation and problem.
- Scope of work can be clearly defined.
- Supports documentation of injury, diagnosis and treatment.
- Black spots and repeat injury patterns easily identifiable.
- Duty of care is highlighted and reinforced.

HELP DESK & TRACKING

- Date recording of when reported, actioned, next step and due.
- Log by who, what, where, when and how.
- Track service delivery with escalation where appropriate.
- Build a knowledgebase of common problems and fixes.
- Grade seriousness based on possibility and impact.
- Visualise workload, timeframes and resource requirements.

THE UNIQUE VALUE OF VAMS

- Innovation made possible by 21st century design and construction techniques.
- Implementation simplified by leveraging any existing VAMS system.
- Minimised risk by using an incremental rather than a "big bang" project approach.
- Capital cost up to 75% lower than comparable systems.
- Lower cost of ownership and save more with our hosting service.
- Track record delivering remote travel and accommodation management since 1983.
- Experienced in remote support with 100,000 rooms managed over 4 continents.
- Foreign language and multilingual support.
