www.vams.com.au

The definitive tool for managing the travel, accommodation, itineraries, bookings, services and manifests of your fly-in/fly-out workforce.

■ PEOPLE AND ROSTERS

Generates flight and accommodation bookings for all your contractors and staff forward to a time horizon of your choosing based on roster patterns and past itineraries. Records personnel contact, medical, travel and compliance information.

■ SERVICES AND TIMETABLES

Services include scheduled and chartered flights, accommodation, training courses, seminars and more. User initiated booking requests from timetables published on the web. Unlimited sectors and support for sector "sharing" between services.

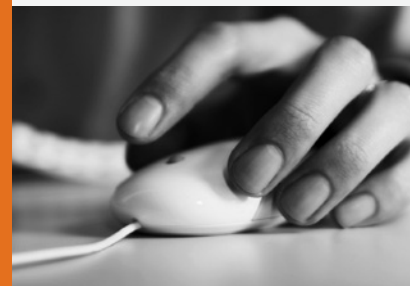

■ BOOKINGS AND ITINERARIES

A Movement Request raised by the user describes all the required services and subsequently becomes the traveller's itinerary. A passenger bulk transfers function assists with last minute "juggling" between flights.

■ MANIFESTS AND TICKETING

Manifests list travellers, their attributes and their booking status, together with transport details common to all travellers. Integrated costing assists with chargeback and on-charging. Ticketing is an optional step.

... flights and travel for
your FIFO workforce ...

THE SOLUTION

A web-based flight and travel system for remote sites that delivers:

- Booking management of travel to and from site.
- Expected movement reporting including status.
- Travel information shared between travel agent and co-ordinator.
- Complete traveller's itinerary adjusted for time zone and directional context.
- Travel manifests including passenger details and payload.
- Ticketing, seating, meals and more.

THE BENEFITS

- Improved accuracy through tight integration and the elimination of errors.
- Access to information means:
 - Anybody with clearance
 - Anywhere with web access
 - Anytime 24 hours a day 7 days per week
- Security and privacy ensured with password protection and data encryption.
- Strategic focus knowing tight operational procedures are in place.
- Process improvement enablers including automation and technology.
- Automated scheduling using a roster centric approach.

THE DIFFERENTIATORS

- More than just flights. Accommodation, rental cars, seminars and more.
- Itinerary management with quick and easy copy, paste and re-use functions.
- Unlimited sectors allow even the most complex flight plans to be defined.
- Multiple site support. A single travel system manages one or multiple sites.
- A single travel office manages multiple site bookings from one travel centre.

THE UNIQUE VALUE OF VAMS

- Innovation made possible by 21st century design and construction techniques.
- Implementation simplified by leveraging any existing VAMS system.
- Minimised risk by using an incremental rather than a "big bang" project approach.
- Capital cost up to 75% lower than comparable systems.
- Lower cost of ownership and save more with our hosting service.
- Track record delivering remote travel and accommodation management since 1983.
- Experienced in remote support with 100,000 rooms managed over 4 continents.
- Foreign language and multilingual support.
